Dear Mr Gordon

I am writing about my concern about our deeply polluted ocean pollution problem. Our oceans were once beautiful places where we loved to go and swim in but ever since plastic was invented our oceans have become our rubbish dump. I believe that you can go and see parliament and make them do something to help.

~~X~~ It is a privilege to have such a varied range of sea birds in our world but scientists estimate 9/10 of them has plastic in their stomachs. This kills them.

Did you know that turtles often eat plastic bags thinking that they are jellyfish. People who throw away rubbish should be imprisoned. Bags can go around the animals mouths and stop them from eating.

Y
You ~~as~~ need to act!

Even though it is hurting animals, it is also hurting us and if you do not know how it works, this is it. Firstly we throw away rubbish and fish eat it. Secondly we eat the fish

Now I know I am ~~am~~ not an expert but I have got ~~one~~ ^{two} ideas that might help: ~~change~~ change people ~~dot~~ for plastic and another inflate fish that eat plastic and ~~can~~ clear up the rubbish and then come back to you so you can safely dispose the rubbish. I hope this letter inspired you.

Yours sincerely

Jamie

Dear Mr Gordon,

I am writing to persuade you to take action on our pollution problem. Each year millions of tonnes of plastic go into the sea and the adorable fish consume it and we eat fish. Then the plastic could affect all of the people in the world.

It's a privilege to have such a giant range of beautiful seabirds in our world, but scientists estimate 9 out of 10 seabirds have plastic in their stomachs. This kills them. Did you know, turtles eat plastic bags thinking there jellyfish.

It's this is my damage to coral that means less Oxygen. People who don't care are villains. We as children want to have Oceans and animals to enjoy when we grow up because they are beautiful. Send this to parliament immediately.

Furthermore, it is not just animals that are being killed. Humans also are in danger because we eat the fish and the fish eat plastic. Some people's jobs depend on the Ocean like fishing.

There is plenty that we can do to help this situation. For example we could charge people for plastic bags and have a Ocean clean up. perhaps you could persuade parliament.

Thankyou for reading my letter. I hope you will act upon some of my Ideas

Yours Sincerely
Lucy

Dear Mr Gordon

I am writing to persuade you to take action on our pollution problem. We need you to help our Sealife and the sea itself. Did you know that 8 million tonnes of plastic is thrown in the sea.

It is a privilege to have such a varied range of beautiful seabirds in our world, but scientists estimate 9 out of 10 of them have plastic bags ~~that~~ thinking in their stomachs. This kills them. Did you know, turtles often eat plastic bags thinking they are jellyfish.

Turtles, also get stuck by the plastic bags that the people put in the ocean, they really need to stop doing it because it is harming animals that were having a lovely life.

Although, it is not just animals that are being hurt, humans are also in danger too. Some people's jobs depend on the ocean being clean and usable such as nets and tubs. Did you know that when a animal eats plastic we eat it too because when we are eating fish we are the plastic in their bodies. This is really sad and I know that you would agree with me if you knew this.

There is plenty that we could do to help this situation. For example, we could have a huge ocean clean up. We could have some more bins. Even though it would be more smelly it will be worth it. Perhaps you could persuade parliament to have a beach clean up every

month or year. I think this make a huge
difference to us and the wild life.

Thank you for reading my letter. I hope
you agree with my thoughts.

Yours Sincerely

Annabella
